

ECPA
Montpellier 2019

Dear colleagues,

Welcome to our second newsletter. To begin, we just want to remind you to keep the dates from **July 8th to 11th 2019** for the [12th European Conference on Precision Agriculture](http://ecpa2019.agrotic.org) (ECPA), which will be held in Montpellier, Occitanie, France. ECPA'19 will be held under the auspices of the International Society of Precision Agriculture (ISPA) and organized by [Montpellier SupAgro](http://supagro.com) (a Higher Education Agricultural College under the aegis of the French Ministry of Agriculture).

The **abstract submission** period is from **June 15th 2018 to September 15th 2018**. Abstract acceptance, for poster or full paper submission will be notified Mid-October (see Key Dates below).

Please visit the following webpage for guidelines and abstract submission:
<http://ecpa2019.agrotic.org/abstract-submission/>

Please make sure to check the conference website regularly for the latest news and updates.

ECPA is a great opportunity for publication!!!!

The academic quality of the proceedings will be guaranteed by an accurate editing through a peer review process by the scientific committee and printing by Wageningen Academic Publishers. After the conference, oral presenters will be invited to expand their manuscripts and submit them to a special issue of the Precision Agriculture Journal.

The higher the attendance the better ECPA works for all!!!!

The ECPA conference is an excellent forum in Europe and worldwide to focus on specific Precision Agriculture topics while discovering what our colleagues are working on, enabling synergies and co-operation.

We are looking forward to seeing you in Montpellier.

The organizing committee
